## Introduction

The GAFSP Trust Fund (“Trust Fund”) was established as a Financial Intermediary Fund (FIF) in April 2010 in the World Bank. The GAFSP is a multilateral mechanism to assist in the implementation of pledges made by the G20 in Pittsburgh in September 2009. The objective is to address the underfunding of country and regional agriculture and food security strategic investment plans already being developed by countries in consultation with contributors and other stakeholders at the country level. The GAFSP operates through two windows: Public Sector Window and Private Sector Window. The Public Sector Window is managed under the Trust Fund while the Private Sector Window is managed by the IFC. This report covers only the Public Sector Window.

### 3. Asset Mix and Investment Income

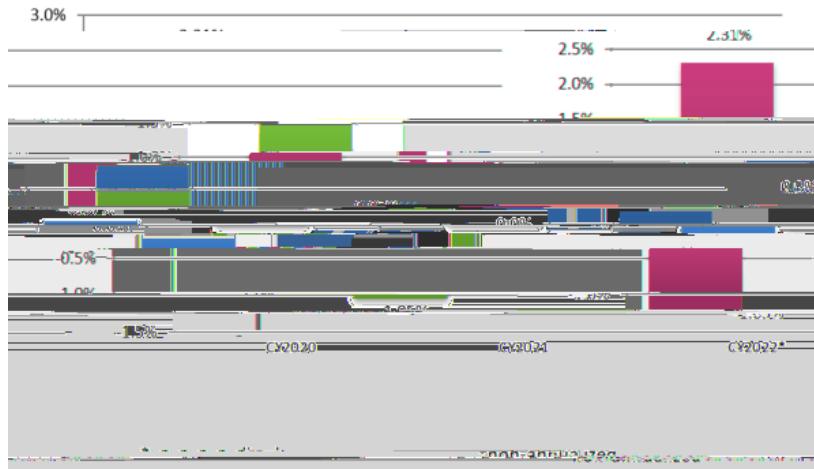

#### ASSET MIX

Cash assets held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the "Pool") for all trust funds administered by the World Bank. The assets in the Pool are managed in accordance with the GAFSP Trust Fund's investment policy.

## INVESTMENT RETURNS

The Trust Fund liquid portfolio earned approximately USD 58.4 million<sup>3</sup> in investment income since inception. The portfolio returns during the first two quarters of calendar year 2022 was negative 1.05%, non annualized. In the context of long lasting inflationary pressures, periods of illiquidity and heightened volatilities across asset classes, rising U.S. interest rates during the first two quarters of 2022 continued to drive down prices for fixed income assets with longer durations, in particular mortgage backed securities.

## ESG SUMMARY REPORT – GLOBAL AGRICULTURE AND FOOD SECURITY PROGRAM INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into the Trustee's investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including the GAFSP Trust Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes to the current investment objectives or risk limits for the GAFSP Trust Fund portfolio.

The GAFSP investment portfolio is primarily comprised of short term high grade fixed income securities (sovereign, supranational and agency securities, and bank deposits), and as of June 30, 2022, the portfolio has an ESG Quality Score\* of 7.85 and an ESG Rating\* of AA. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, GAFSP's investment portfolio falls in the top decile of the ratings universe. This reflects high capability of GAFSP portfolio's holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.
